## SUMMARY:

- 1 years of cumulative software design and development experience with a proven track record of delivering high-quality web applications.
- Strong knowledge of JavaScript, HTML, CSS, Bootstrap, Tailwind, Asp.net and related technologies.
- Passionate about developing user-friendly and visually appealing applications that meet the needs of clients and end-users.
- Committed to utilizing my skills to further the mission of the company. Proficient in various platforms and languages.
- Good analytical & design skills, focused approach, team player, hardworking and professional attitude towards work.

## ACADEMIC EDUCATION:

| Education Level: | Institute: | Year |
|---|---|---|
| Graduation (BSCS) | University of South Asia, Lahore, Pakistan | 2018 to 2022 |

## TECHNICAL BACKGROUND:

| | |
|---|---|
| Frontend skills | JavaScript, AngularJS, typescript. |
| UI/UX skills | HTML, CSS, Bootstrap, Material UI, Tailwind, jQuery, Flexbox. |
| Development Tools & IDEs | Visual Studio Code, Sublime |
| Configuration, Build and Project Management Tools | Git |

## PROFESSIONAL WORK EXPERIENCE:

- ❖ eSoftage Solution (Jan-2024 – June-2024) – Associate Software Engineer
- ❖ VU360 Solutions (Jun-2023 – Dec-2023) –Software Engineer

## PROFESSIONAL PROJECTS:

### ❖ Company Project at eSoftage:

A comprehensive project developed for eSoftage using Angular, focused on creating responsive and dynamic web components. A comprehensive project developed for eSoftage using Angular, focused on creating responsive and dynamic web components. **Role & Accomplishments:**

- **Component Development:** Developed various reusable and dynamic components using Angular, enhancing the modularity and maintainability of the application.
- **Routing Implementation**: Implemented routing to navigate between different components efficiently, improving the overall user experience.
- **Responsiveness**: Ensured all components were fully responsive, providing an optimal user experience across different devices and screen sizes.
- **Project Documentation**: Contributed to the comprehensive documentation of the project, detailing the functionalities and features implemented.

## ❖ BizMate

A project developed for Bizmate using Angular, focusing on creating responsive and dynamic web components.
**Role & Accomplishments:**

- **Component Development:** Developed various reusable and dynamic components using Angular, enhancing the modularity and maintainability of the application.
- **Routing Implementation:** Implemented routing to navigate between different components efficiently, improving the overall user experience.
- **Responsiveness**: Ensured all components were fully responsive, providing an optimal user experience across different devices and screen sizes.

## ❖ eSyncMate

A versatile application developed using Angular and ASP.NET Core 8, designed for seamless data synchronization and management. **Role & Accomplishments:**

- **Component Development**: Created various components using Angular with Material Grid, enhancing the visual appeal and functionality of the application.
- **API Development**: Developed CRUD APIs using ASP.NET Core 8, facilitating efficient data management and operations.
- **Authentication**: Implemented comprehensive authentication mechanisms to ensure secure access and data integrity. **Authentication**
- **Responsiveness**: Ensured the application was fully responsive, providing an optimal user experience across all screen sizes.
- **Database Management**: Utilized SQL for database management, ensuring efficient data storage, retrieval, and integrity.

## ❖ Food Ordering App

An application facilitating food orders with secure user authentication and efficient order processing.

**Role & Accomplishments:**
- **API Development:** Created APIs for managing food orders, enabling users to place and track their orders seamlessly.
- **Technology Stack:** Developed the backend using ASP.NET Core 6 and SQL for efficient data handling and scalability..
- **Database Management**: Managed SQL databases to store and retrieve order information, ensuring data integrity and quick access.
- **Authentication**: Implemented robust authentication methods to secure user data and transactions, ensuring a safe ordering experience.
- **User Interaction**: Enhanced the user interface to provide a smooth and intuitive ordering process, contributing to higher user satisfaction and engagement.

## ❖ KayaKhana App

A financial management application designed to track and categorize expenses such as grocery, medicine, hospital, and savings.

**Role & Accomplishments:**
- **API Development**: Developed robust APIs to track and categorize various types of expenses, ensuring efficient financial management for users.
- **Technology Stack:** Utilized ASP.NET Core 6 for building scalable and secure web APIs.
- **Database Management**: Designed and managed the SQL database, ensuring efficient data storage and retrieval for financial transactions.
- **Authentication**: Implemented comprehensive authentication mechanisms to ensure secure access to financial data, enhancing overall application security.
- **User Experience:** Contributed to a user-friendly interface, allowing users to easily manage and monitor their investments and expenditures.
